PLANNING YOUR LEGACY

We are excited that you are taking the next steps to protect those you love through estate planning. A plan is very important, it is estimated that 70% of Americans don't have a will/estate plan. The Planning Your Legacy Guide will help make the process easy and understandable.

A person may work 50 years to buildup assets and spend 10 to 20 years conserving the buildup, but often only take a few hours to plan for their future and the distribution of assets. Through thoughtful planning, a chapter in the book of your life can be completed. However, too many times there has been little or sometimes no planning; missing the opportunity to leave a legacy.

This booklet is designed to introduce you to a plan that writes a very good chapter in the book of your life. One of the many ways to leave a legacy is through an estate plan. This guide will address how proper planning will allow you to leave a legacy to your family and friends that can be encouraging and inspiring. A Guide to Planning Your Legacy is created to motivate you to think about how you want your assets to be distributed and assist you in gathering the information your professional advisory team will need. If you would like additional information on ways to leave a legacy, besides an estate plan, please connect with us by contacting our team through the Legacy Tulsa website at www.LegacyTulsa.com

What are the benefits of an estate plan?

Peace An estate plan is created to help you provide for those you care for and protect both you and your loved ones.

Provision You have spent many years of your life gathering assets and making plans. With a good estate plan, you can give your loved ones the property you have acquired the right way, at the right time at a small cost; and include philanthropic causes that mean the most to you.

Protection A good plan will protect you in your later years. It may be important to designate a person to manage your property, help medical professionals with important decisions, and make certain that you are receiving the best possible care. An estate plan can increase lifetime security and help you achieve your goals for family and charity.

Philanthropy As you have given to the many causes throughout your lifetime you can continue your giving beyond your living.

WHAT IS LEGACY?

Legacy is not just about possessions and investments. Legacy is a combination of elements involving your family, finances and philanthropic causes.

What is most important to you? What are some tools for transferring your family values? These questions and more like these go unanswered in legacy planning because the focus is generally on our possessions rather than our principles. Here are some sample questions to ask yourself so that you can begin to plan ways to transfer your values and life lessons.

- What values would you like continued for the generations that will follow you?
- What charitable organizations have you valued during your life?
- What are your plans for continuing the family business?
- Who should receive your personal possessions? Have you listened to family members tell stories about their favorite family heirlooms?
